FOR IMMEDIATE RELEASE

UNIGUEST™ AND THINIX® FORM STRATEGIC PARTNERSHIP

Partnership will bring next generation of products and services to lodging, healthcare and restaurant sectors.

NASHVILLE, Tenn. (May 18, 2010) – Uniguest™, a provider of print, technology and specialized services globally for the lodging, restaurant and healthcare industries, today announced it has formed a strategic partnership with Thinix®, a leading developer of touchscreen user interface, secure computing and embedded solutions for the lodging, healthcare and education markets. The companies will be working together to develop selected new technology for Uniguest’s clients.

“We have been searching for the ideal technology development partner to expand our solutions and ultimately benefit our customers,” said Shawn Thomas, CEO and co-founder of Uniguest. “Thinix fits the bill. Its products are the perfect complement to ours. In the upcoming months, we will be announcing our next generation of products and services. Many of them will be co-developed with Thinix.”

“Given its leadership position, it was a natural choice to partner with Uniguest to enhance our footprint in hospitality and other markets,” said Don Van Oort, Thinix’s Chief Technical Officer. “Uniguest is devoted to providing technology and services that enhance the offerings of its customers, and we at Thinix are honored to work with another market leader that has the same goals.”

Uniguest’s products include custom-printed publications, security software solutions, self-serve kiosk solutions, digital signage, advertising sales and help-desk computer support.

Thinix’s offerings include secure computing technologies, kiosk software, touchscreen infotainment and entertainment systems, enterprise management platforms and conference and meeting room systems for the hospitality, healthcare, education and industrial markets.

“We look forward to even more innovation and growth in the future with Thinix as one of our software and hardware partners,” added Thomas.
