

UNIGUEST BOARDING PASS STATION

Your guests are always first in line

The Boarding Pass Station makes it easy for your guests and visitors to securely check in to flights and print boarding passes from the convenience of your property. As a result, they'll spend less time in queue at the airport — and more time increasing your property's F&B revenue.

The Boarding Pass Kiosk is designed for ease and speed. The user interface is personalized with your brand identity and prominently features the airlines operating out of your local airport.

The Boarding Pass Kiosk is available on Mac and Windows computers as a dedicated, single-purpose kiosk, or it comes bundled with our full business center solution, Uniguest Connect. Both solutions are supported 24/7/365 by our in-house team of experts, the UCrew.
