

GREEN WALLS

by Uniguest

Green Walls are at the cutting edge of design and are safe to install on almost any structure, indoors and outdoors.

Green Walls can be placed in almost any location and require little on-going maintenance. Unlike live plants that must have suitable environmental conditions and regular professional care, our walls will retain their appearance naturally year over year. Excellent greening of meeting space & common areas can be achieved with our Green Wall Solution. They make a dramatic statement and create a welcoming environment for employees, clients, and visitors.

FEATURES

- Sound dampening – walls capture 90% of medium & high frequency sounds
- Reduces stress and adds aesthetic value
- Installations can be placed just about anywhere
- 100% maintenance free
- Sustainable product model
