

# U-SIGN PRO

**ONELAN  
DIGITAL SIGNAGE  
FROM UNIGUEST**

Simplified digital signage to keep your guests up-to-date, on time, and in the know.

U-Sign Pro is built on the ONELAN digital signage platform from Uniguest. This powerful, out-of-the-box offering gives you the ability to display image slideshows, video content, restaurant and amenity menus, stock market info, local news, traffic and weather. Plus, with the ONELAN digital signage platform, you can easily add your flightboard and events information onto the same player.

Best of all, adding and updating slide content is fast and easy. And because we stripped out all the extraneous features that can make digital signage so complicated, ONELAN digital signage is incredibly cost-efficient for your hotel, too.
